

# Macromolecular Research

## Aims and Scope

*Macromolecular Research* publishes original researches on all aspects of polymer science, engineering, and technology, which have not been or are not to be published elsewhere. Papers include Articles, Communications, Notes, Reviews, and Feature articles on the same basis. Articles are comprehensive reports of significant results and should have high scientific quality and originality. Communications should be preliminary reports of unusual urgency and significance. A more complete paper may be published at a later date. A Note deals with a limited subject which requires no further elaboration in the future. The length of both Communications and Notes should be less than 2000 words. Reviews should be short, critical surveys of progress in limited fields of macromolecular research made in recent years. Feature articles are invited reviews self-centered on the author's own research and may contain original results.

## Copyright Information

### For Authors

Submission of a manuscript implies: that the work described has not been published before (except in form of an abstract or as part of a published lecture, review or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as – tacitly or explicitly – by the responsible authorities at the institution where the work was carried out

Author warrants (i) that he/she is the sole owner or has been authorized by any additional copyright owner to assign the right, (ii) that the article does not infringe any third party rights and no license from or payments to a third party is required to publish the article and (iii) that the article has not been previously published or licensed. The author signs for and accepts responsibility for releasing this material on behalf of any and all co-authors. Transfer of copyright to Springer (respective to owner if other than Springer) becomes effective if and when a Copyright Transfer Statement is signed or transferred electronically by the corresponding author. After submission of the Copyright Transfer Statement signed by the corresponding author, changes of authorship or in the order of the authors listed will not be accepted by Springer.

The copyright to this article, including any graphic elements therein (e.g. illustrations, charts, moving images), is assigned for good and valuable consideration to Springer effective if and when the article is accepted

for publication and to the extent assignable if assignability is restricted for by applicable law or regulations (e.g. for U.S. government or crown employees).

The copyright assignment includes without limitation the exclusive, assignable and sublicensable right, unlimited in time and territory, to reproduce, publish, distribute, transmit, make available and store the article, including abstracts thereof, in all forms of media of expression now known or developed in the future, including pre- and reprints, translations, photographic reproductions and microform. Springer may use the article in whole or in part in electronic form, such as use in databases or data networks for display, print or download to stationary or portable devices. This includes interactive and multimedia use and the right to alter the article to the extent necessary for such use.

Authors may self-archive the Author's accepted manuscript of their articles on their own websites. Authors may also deposit this version of the article in any repository, provided it is only made publicly available 12 months after official publication or later. He/she may not use the publisher's version (the final article), which is posted on SpringerLink and other Springer websites, for the purpose of self-archiving or deposit. Furthermore, the Author may only post his/her version provided acknowledgement is given to the original source of publication and a link is inserted to the published article on Springer's website. The link must be accompanied by the following text: "The final publication is available at link.springer.com".

Prior versions of the article published on non-commercial pre-print servers like arXiv.org can remain on these servers and/or can be updated with Author's accepted version. The final published version (in pdf or html/xml format) cannot be used for this purpose. Acknowledgement needs to be given to the final publication and a link must be inserted to the published article on Springer's website, accompanied by the text "The final publication is available at link.springer.com". Author retains the right to use his/her article for his/her further scientific career by including the final published journal article in other publications such as dissertations and postdoctoral qualifications provided acknowledgement is given to the original source of publication.

Author is requested to use the appropriate DOI for the article. Articles disseminated via link.springer.com are indexed, abstracted and referenced by many abstracting and information services, bibliographic networks, subscription agencies, library networks, and consortia.

### For Readers

While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher (respective the copyright owner if other than Springer). The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

Springer has partnered with Copyright Clearance Center's RightsLink service to offer a variety of options for reusing Springer content. For permission to reuse our content please locate the material that you wish to use on link.springer.com or on springerimages.com and click on the permissions link or go to copyright.com, then enter the title of the publication that you wish to use. For assistance in placing a permission request, Copyright Clearance Center can be connected directly via phone: +1-855-239-3415, fax: +1-978-646-8600, or e-mail: info@copyright.com.

### State of Ethical Issue

Macromolecular Research and Springer Nature provide a set of statement of ethical issue for persons engaged in the publication in Macromolecular Research.

### Preparation of Manuscript

The manuscript should be submitted to the Editor-in-Chief via online through the submission site at <https://www.editorialmanager.com/mare/default2.aspx>. Manuscript should be prepared on a white paper of 22×28 cm or A4 paper, one side only, with adequate margins. The entire manuscript should be double-spaced. Please click the 'Login' button from the menu above and log in to the system as 'Author'. Then submit your manuscript and track its progress through the system. A wide range of submission file formats is supported, including: Word, WordPerfect, RTF, TXT, TIFF, GIF, JPEG, EPS, LaTeX2E, TeX, Postscript, PICT, Excel, Tar, Zip and Powerpoint. PDF is not an acceptable file format. Authors should present their work in concise and clear English. The name of author to whom inquiries about the paper may be addressed should be marked with an asterisk. Running Heads (less than 50 letters) should be placed between the title of the paper and the abstract. An abstract should be provided for all Articles, Communications, Notes, Reviews, and Feature articles. Abstracts should explain briefly the reason for the work, the significant results, and conclusions. Other subheadings, such as Introduction, Experimental, Results and Discussion, and References, should be flush left and in boldface type or underlined, with initial capitalization only. All pages should be numbered consecutively, including reference

and notes, figure captions, and tables, grouped in that sequence following the text. Original copies of graphs, drawings, structural formulas and photographs should be included at the end of the manuscript and authors should indicate in the typeset where these are to be inserted. Figures and graphs should be carefully prepared line drawings and only the originals and high-quality reproductions are acceptable. Symbols and lettering (typewriter labeling is unacceptable) should be compatibly sized for optimum reproduction. References to the literature and all notes (except those in tables) should be numbered in one consecutive series. Reference numbers in the text should be typed as superscript numbers without parentheses or spaces, but enclosed in parentheses in the reference section following the text. References should be arranged and punctuated.

All manuscripts must be accompanied by a brief summary of the key findings of the work and a graphic that depicts the topic addressed. These brief summary and related illustration will be published in the table of contents. The summary should be a description of the accompanying graphic and must reflect accurately the content of the manuscript. Such summaries are limited to 50 words in length and should not be confused with the abstract. The graphic could be in the form of a structure, reaction scheme, graphical data, photograph etc., but not a table. The author must submit a graphic in the actual size to be used, 4.5 cm high and 5 cm wide. Font size of labels, formulas, or numbers within the graphic must be legible. Authors are advised to use systematic names similar to those used by Chemical Abstracts Service and the IUPAC. Chemical Abstracts nomenclature rules are contained in Appendix IV of the current Chemical Abstracts Index Guide. The basic rule is to use SI unit for all types of units.
